Fjorentina Hoxha

Fullstack Developer

PROFILE

Frontend Developer experienced in crafting user-friendly interfaces and dynamic features, with additional experience in backend development using Python and Django. Skilled in UI transitions, interactive map development, and building dynamic web applications. Ready to boost user engagement and contribute innovative full-stack solutions within a team setting.

EMPLOYMENT

Fullstack Developer

Nov 2021 – Present

Division5 · Tirana

- Revamped the user interface by transitioning the entire frontend from Bootstrap to Tailwind CSS.
- Engineered dynamic map circles for the ‘secret location’ feature, enabling them to shrink and shift as the event start time approaches, maintaining an element of surprise while minimising long entrance queues (Next.js/React & Django/Python).
- Expanded city coverage by replacing the dropdown selection with an interactive map selector.
- Cultivated social-network features, including user profiles with friending capabilities, event following, and a searchable directory.

> I work as a fullstack developer at Division5, providing development services for Rausgegangen.

Builder.js Developer

Sep 2020 – Jun 2021

DigiCrop · Paris (Remote)

- Created dynamic web applications using Builder.js, significantly enhancing user engagement and functionality.
- Collaborated with cross-functional teams to define and implement innovative solutions.

Fjorentina Hoxha

Fullstack Developer

EDUCATION

Master of Science

Jan 2020 – Jan 2022

Faculty of Natural Sciences · Tirana, Albania

Bachelor's Degree

Jan 2017 – Jan 2020

Faculty of Natural Sciences · Tirana, Albania

PERSONAL PROJECTS

Henna Tattoo Albania

henna-tattoo-albania.com ↗

Designed and developed a modern website for a henna tattoo studio in Tirana, showcasing services, custom designs, events, and an online shop.

Hijab Throne

hijabthrone.al ↗

Developed an e-commerce front end with React/Next.js and Tailwind CSS, adding multi-category navigation, product grids with filters, and a seamless shopping flow.
